GREYWATER Diversion System

Working with
the environment.

Introduction

Aquarius® Wastewater Management is a privately owned Western Australian manufacturer of Wastewater Systems. We manufacture a comprehensive range of wastewater diversion systems, wastewater treatment systems, and ancillary products, for both domestic and commercial applications.

Aquarius® Greywater System

All greywater from showers, bath/spas and laundries is collected in a small WA DoH approved polyethylene tank outside the house. The tank contains an Orange high quality stainless steel and cast iron pump which is float activated. When the float rises the greywater is pumped to a 25mm header pipe and then into a sub-surface dripper system which feeds the roots of the plants.

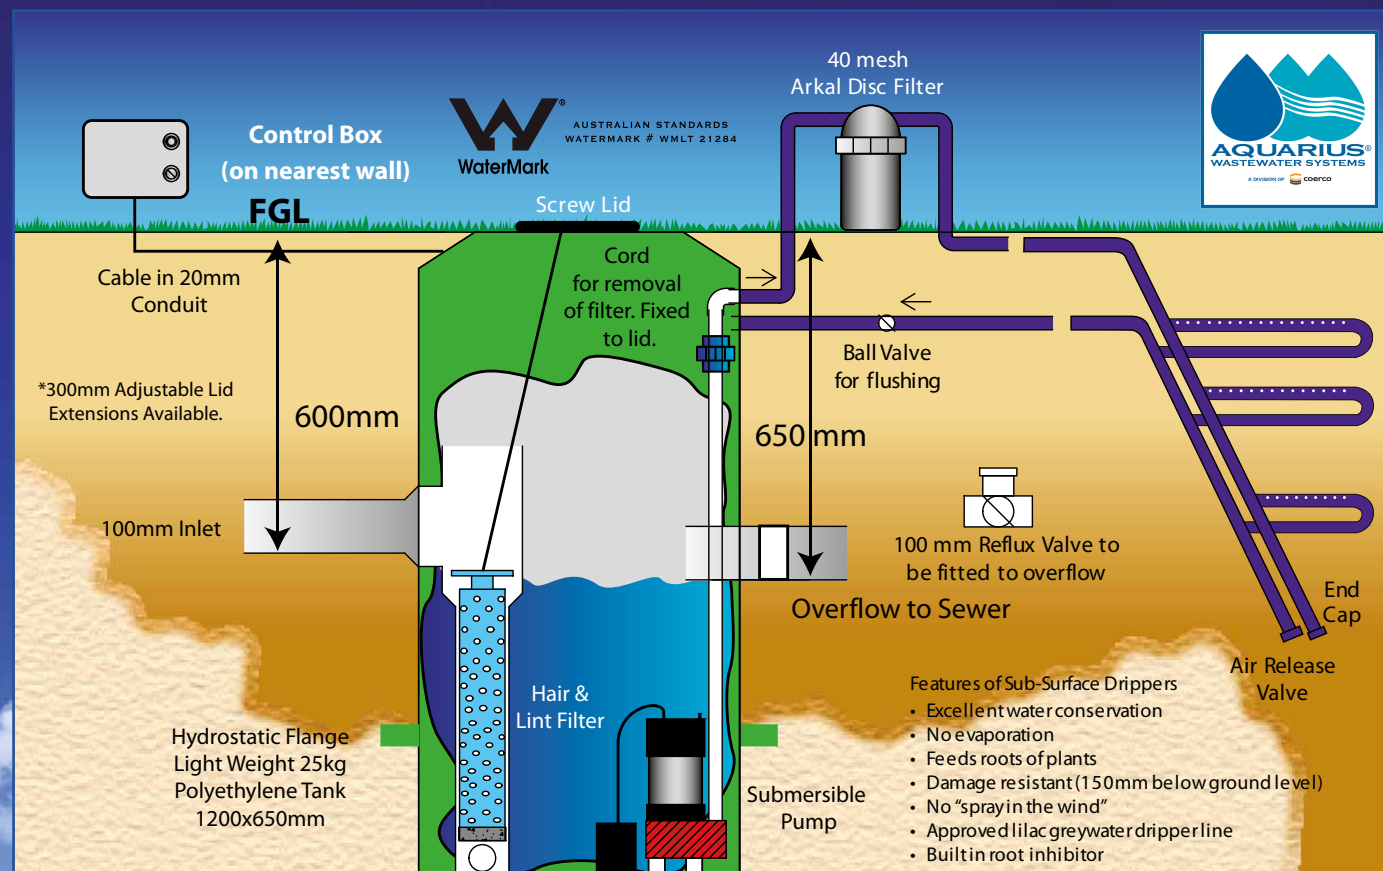

Sub-surface dripper system coverage can be increased by installing additional dripper lines, valves and solenoids.

Two separate filters and a ball valve keep the system clear of debris such as lint and hair. The system has an Australian Standard main electrical control box with an audible alarm.

Why Aquarius® Greywater Unit?

We live in a world where mankind is placing increasing pressures on our finite resources. The average family dumps over 250,000 litres of greywater down the sewer each year.

The Aquarius® Domestic Greywater Diversion Unit recycles this water for sub-surface irrigation in your garden. Should you wish to turn off the unit or the power fails the greywater will automatically divert to sewer until power resumes.

Where are Aquarius® Units Used?

Aquarius® Greywater Units can be used anywhere where large quantities of useable water are wasted.

- Residential homes
- Mining camps
- Caravan parks
- Recreational facilities
- Commercial and Industrial Developments
- Hotels, Motels
- Unit development
- Wineries

Manufacturers warranties:

Tanks 10 years.

Orange Pumps 2 years.

Irrigation and Electrical components 1 year.

Aquarius® Domestic Greywater Diversion System.

Complete Package:

Everything you need is provided.

- Tank & Filters
- Orange Pump
- 100mm Check Valve
- Control Box
- 25m Lilac Header Pipe
- 25m Lilac Return Pipe
- 60m Lilac Dripper Line.
